Superstore Sales Performance Diagnostic

Regional & Product – Level Profitability Review

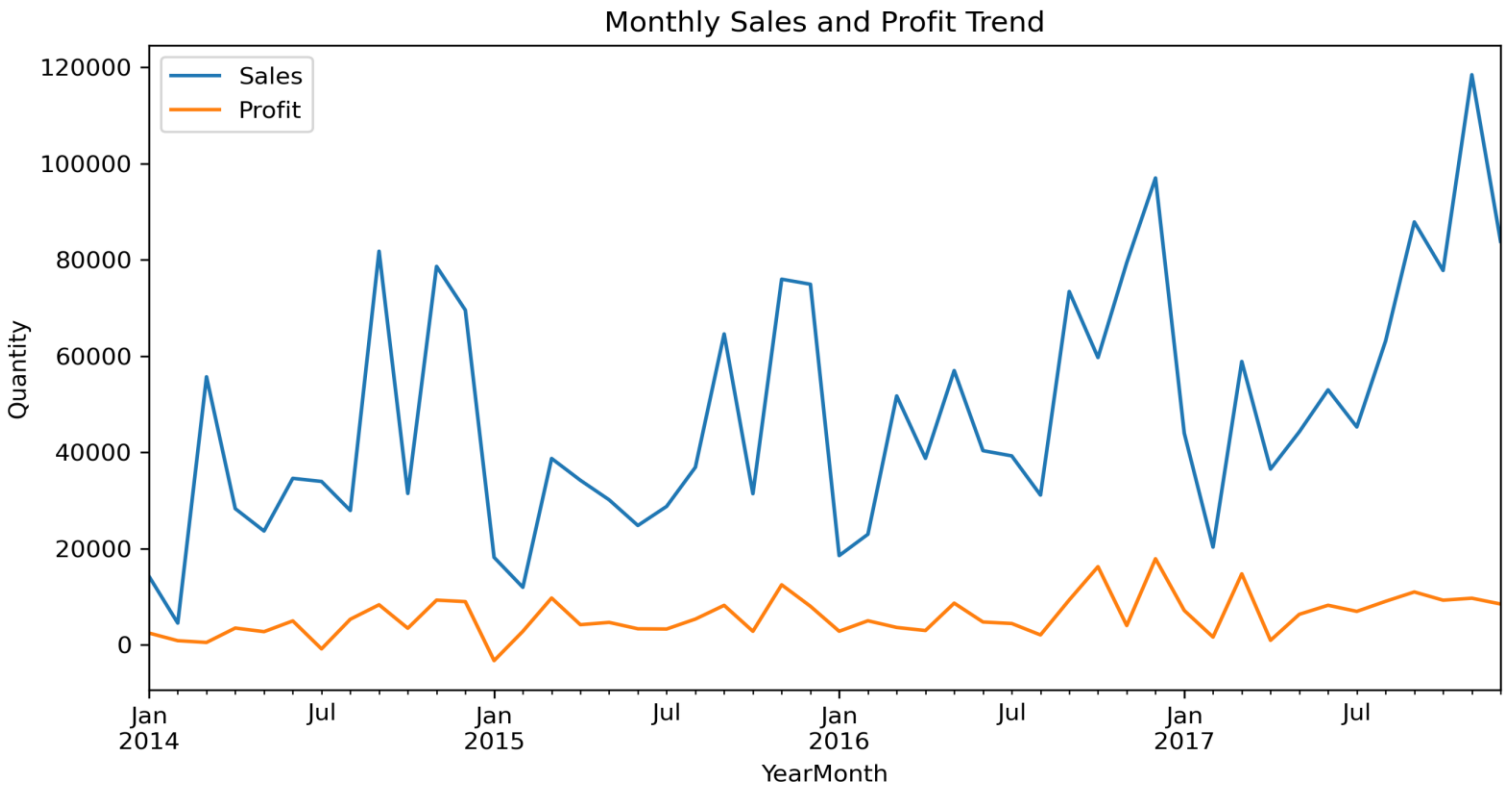
Fatiha Okesola

March 2026

Executive Summary

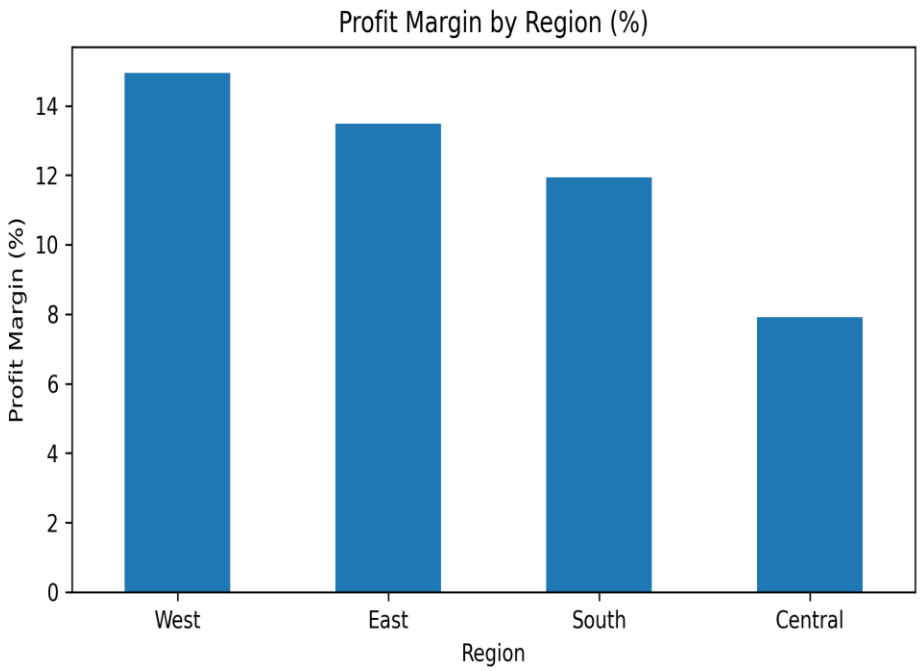
- Overall margin stable at **12.47%**
- Profitability dispersion across regions
- Furniture is margin-dilutive
- Losses concentrated in **Tables (East region)**
- Pricing discipline reduces losses by ~73%

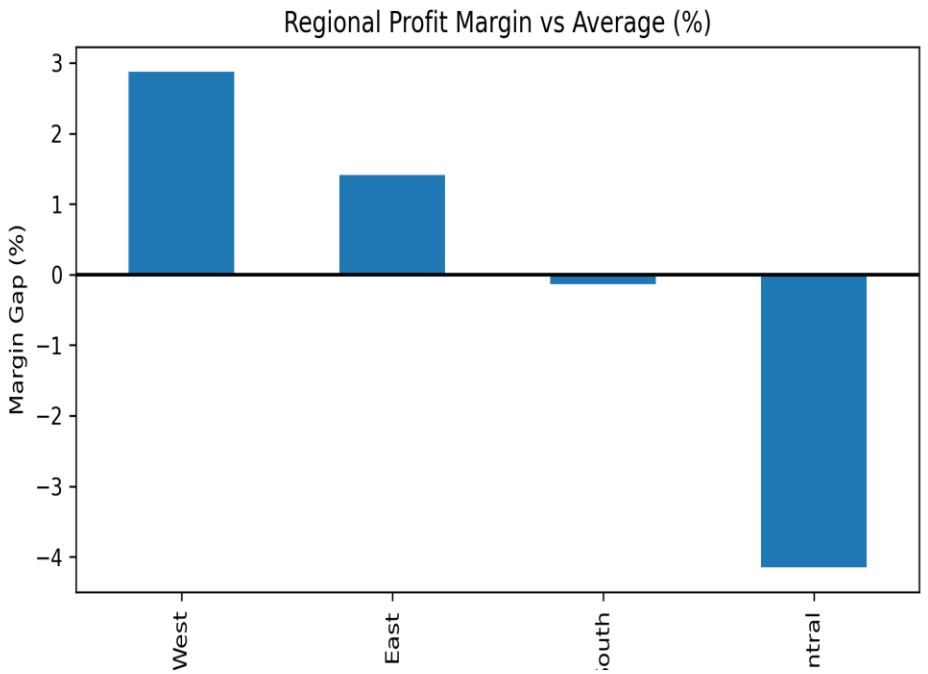
Company-Level Performance is Stable



- Sales and Profit move together
- No sustained margin deterioration
- Indicates localized rather than systemic issues

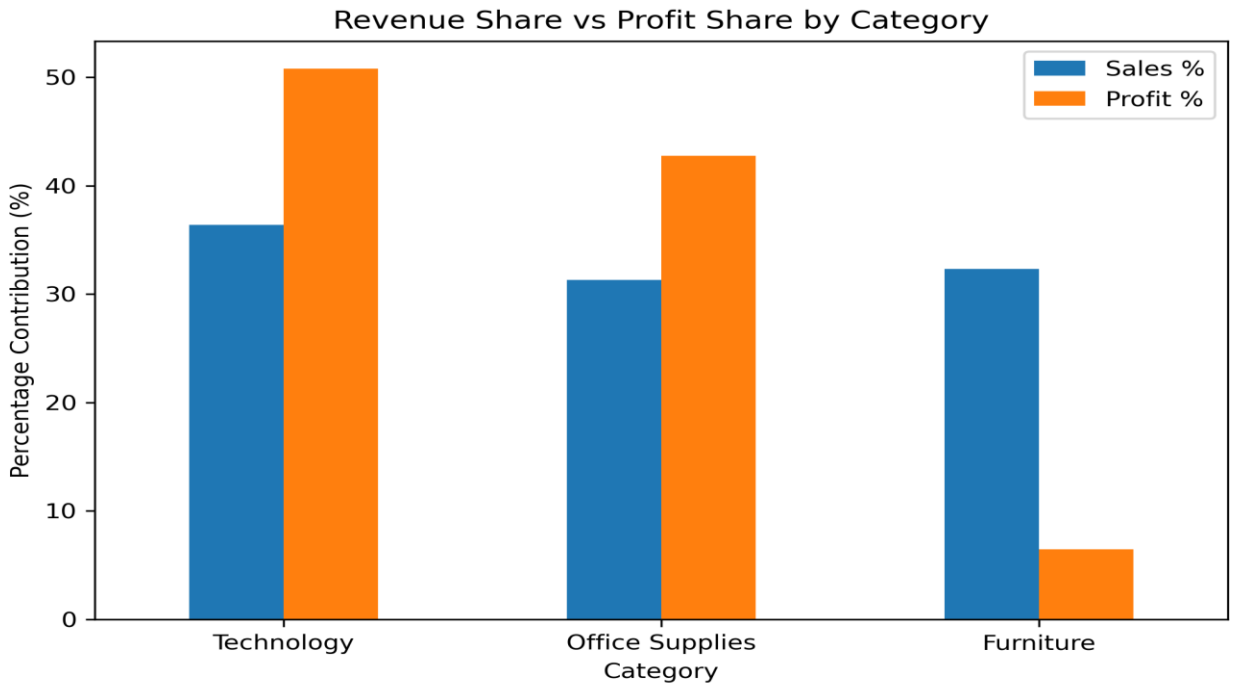
Regional Profitability Dispersion





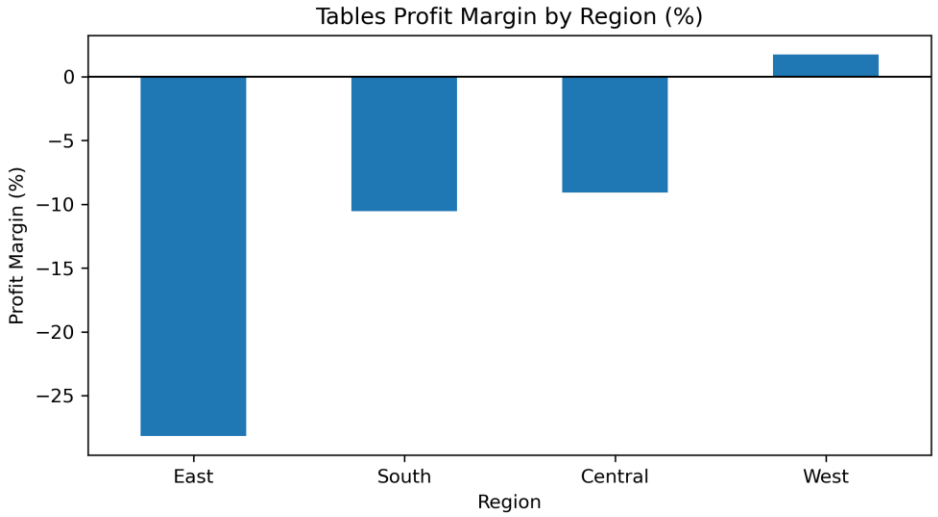
- Central materially underperforms
- West and East exceed the average margin
- Margin gap suggests structural differences

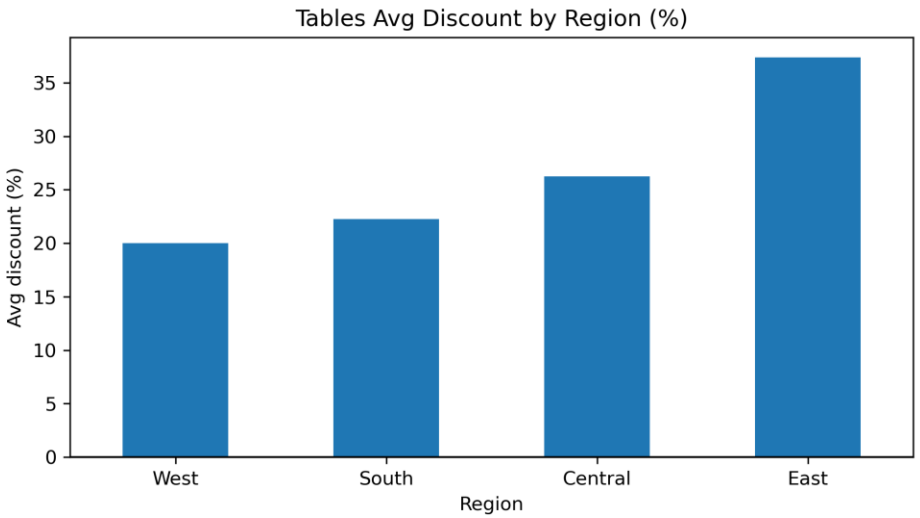
Revenue vs Profit Contribution Imbalance



- Revenue balanced across categories
- Furniture: ~ 32% revenue
- Furniture: ~ 6% profit
- Indicates margin-dilutive mix

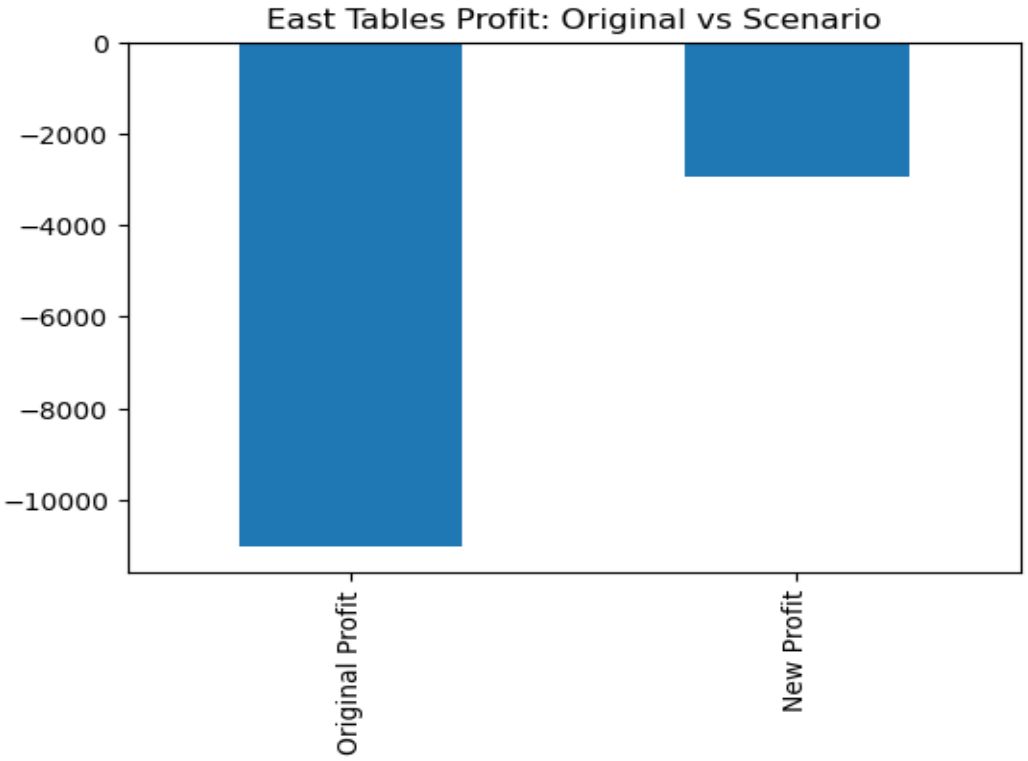
Loss Concentration – Tables (East Region)





- East discount: **37.4%**
- Margin: **- 28%**
- Discounting does not increase volume
- Strong negative discount-profit relationship

Pricing Intervention Impact



- Reduce East Tables discount to 25%
- Estimated improvement: **~$8.1K**
- **~73%** reduction in losses
- Pricing discipline is a high-impact lever

Recommended Actions

- Implement targeted discount control in East Tables
- Prioritize loss-making sub-categories
- Monitor profitability response
- Investigate structural cost drivers

Targeted pricing discipline presents a measurable opportunity to improve profitability without structural restructuring.
